WEATHER KEY POINTS

10/24/19 - 10/30/19

Thursday-Friday

- Critical fire weather conditions due to gusty north to northeast winds and low relative humidity will continue Thursday for portions of the Coastal and Inland Regions
 - Wind gusts generally up to about 45 mph in the impacted portions of Coastal and Inland Regions. Locally higher gusts possible over exposed ridgelines and in canyons. Wind gusts in the windiest areas in the North Bay could gust up to 60 mph
 - Critical fire weather conditions will diminish across northern California Thursday evening through Friday
- A strong Santa Ana wind event will affect much of Southern Region through Friday, with gusty to damaging winds and extreme fire danger.
 - Combined with very dry relative humidity, widespread critical to very critical fire weather conditions are expected
 - Northeast winds 20-35 mph with gusts 50-60 mph generally expected in the prone areas

Saturday-Monday

- Another critical fire weather event is expected for northern California Saturday evening through Monday morning, and it is likely that this will be an even stronger event
 - There is a chance that winds will be strong enough to cause damage in some locations in northern California.
 - The strongest winds are expected on Sunday across the North and East Bay areas
 - Across southern California, this next wind event is currently expected to be a less impactful event, but confidence in wind speed across Southern Region details remains low.
- This event will most likely taper off beginning Monday morning, but there is a slight chance this event will extend into Monday night.

Tuesday-Wednesday

- No impacts are expected
